

Küba SG commercial

Küba SG commercial: Specific advantages

High performance air cooler for commercial applications with a large scope and complete capacity spectrum.

Draw-through fans guide the air flow evenly through the heat exchanger, enabling the maximum use of the air cooler surface.

Q_0 0,7 — 32 kW

Goods are cooled down more quickly with optimum air distribution, thanks to the patented, standard air straightener.

The Küba SG commercial can cope with the most difficult environmental demands due to its comprehensive standard equipment and numerous alternative versions as well as accessories.

Precision in the cold storage room has a name: Küba SG commercial

The Küba SG commercial sets the worldwide standard for all high performance Air Coolers in cold and frozen Chill Rooms.

Küba SG commercial: Specific advantages

What are the effects of a long air throw range?

Grille

Grille and guide-wheel

Küba air straightener

Air throw comparison at a nominal capacity of 5.95 kW

Küba SG commercial: Specific advantages

Goods stay at a uniform temperature due to improved air distribution

Refrigeration in large, long cold storage areas can be effected with Küba Air Coolers. Very long throw ranges can be achieved with the air straighteners. This allows the chilled air to reach the most remote corners of the cold storage area. In connection with the product specific stacking, room ventilation is trouble-free. Heat pockets are prevented.

Clear advantages are:

- Even air distribution
- Short cooling times
- Uniform product cooling
- No fluctuations in product temperatures
- Quality is retained

Küba Air Straighteners ➔ **short cooling times**

**Cooling curve comparison
Küba high performance SG Air Coolers**

Without Küba Air Straighteners

- Poor room ventilation
- Large differences in product temperatures: 6K
- Relatively long cooling times

With Küba Air Straighteners

- Better distribution of cooled air
- Products are cooled more evenly: 1K
- Short cooling times
- Lower temperature difference (DT1)
- Lower operational costs

Key:

- t_0 = Evaporating temperature at coil outlet
- t_{0h} = Superheated temperature at coil outlet
- t_{L1} = Air entry temperature into the air cooler

Küba Air Straighteners ➔ **More uniform product temperatures**

**Uniform product temperatures:
Documented by measurement series in cold storage area**

To perform the cooling curve comparison, a cold storage area was filled with stacks of goods. The measuring points 1-11 show the development of the product core temperature in relation to cooling time.

The starting conditions were identical in both trials – entry temperature 24 °C. For the cooler without an Air straightener, the temperature difference in the stack of goods after 21 hours cooling time was 6K.

The Küba SG with Air straightener achieved the outstanding result of only a 1K temperature difference.

Construction

1. Casing

- Al-Stucco
- High-grade powder coating, papyrus white RAL 9018
 - Food quality
 - Easy to clean
 - Optimum corrosion protection
- Drip tray and side panels removable
- Stainless steel mounting material and brackets
- Plastic drain

2. Heat exchanger

- Fin spacing
 - SGA.C: 4,5mm
 - SGB.C: 7mm
 - SGL.C: 12mm
- Tube arrangement aligned, spacing 50 x 50 mm
- HFE® tube / fin system
- Tubing: Cu-special
- Fins: Al
- End plates: Al
- Küba-CAL® refrigerant distributor for multiple injection

3. Fans

- Ø250 to 500 mm
- In accordance with VDE specifications with built-in protector
- Application range: -40 °C bis +45 °C
- SG. 011 -083C: 230 ±10%V-1~, 50/60Hz
- SG.091 -103C: 400±10%V-3~, 50/60Hz
- Protection class IP44 in accordance with EN 60529
- Insulation class F in accordance with EN 60034
- Operating data can be found with Küba Select or in the technical data

Note:
4 and 4 motor models on request

4. Electrical defrost

- 230 ±10% V-1~ or 400 ±10% V-3~ -Y
- Heaters with CrNi steel sleeve
- Vapour-tight connections
- Connector cable 1.5 mm² x 1000 mm
- Designed to defrost the fin package quickly and evenly
- To prevent vapour build-up and to accomplish heat transfer with almost no loss, the heaters are mounted in special expanded tube sleeves
- Wired ready for connection to the connection box in accordance with VDE specifications

Refrigerant / coolant

- Can be used with all HFC refrigerants, performance data can be found with Küba Select (Product Selection Software)
- For water / brine circulation choose your air cooler with Küba Select
- For CO₂ operation and for NH₃ applications immediate selection with Küba Select is possible; or ask our technical staff in sales

The performance data in the Q_v charts refer to the combination of materials: tubes, Cu / fins, Al.

Küba Blue Line
Freshness that lasts longer

* Multiple injection with direct expansion using Küba CAL® distributors. The cooler rating at 60 Hz is 10% higher on average due to the higher speed and higher air flow.

52

Q_v chart (EN328, R404A) SGL...C  **12 mm**

Q₀ = Cooling capacity
 t_{L1} = Air inlet temperature
 t₀ [°C] = Evaporating temperature (coil outlet)
 DT1 [K] = Temperature difference = t_{L1} - t₀ (°C)

DT1 = 4 K bis 6 K
 with electronic expansion valve

Example selection:
 For example and explanation, see the information section on p. 136.

The dimensions are only valid for standard model design!
Note the differences in dimension for versions and accessories.

Models

Motor versions

• **Version V1.33 – quiet design**

Particularly suited for sales areas, etc.

- Reduced air flow rate, VL
- Lower sound power level, Lw (A)
- Fans 230 ± 10% V-1~

For other alternative motor versions, see Küba Select or version overview, p. 126

Water / brine circulation

• **Version V2.05**

Large number of circuits (small pressure drop)

• **Version V2.06**

Small number of circuits (large pressure drop)

Casing versions

Double insulated drip tray

• **V3.09**

The double insulated drip tray has 25 mm of insulation.

The insulation prevents condensation water from building up on the bottom side of the tray and reduces the transfer of defrosting heat into the Cold Room.

This changes the following dimensions:

Width B: +60 mm

Hight H: +30 mm

Depth T: +30 mm

Hinged fans

• **V3.10**

To make the coolers easy to clean, the fans are mounted with stainless steel hinges.

Hinge-down drip tray

• **V3.11**

The hinge-down drip tray is easy to assemble and makes it easy to clean the devices from below.

Defrost versions

All Küba Air Coolers are available with electric defrosting. See nomenclature, p. 48

Hot gas defrost in the drip tray

- Hot gas connection on both sides
- V4.01 Copper design
- V4.02 Stainless steel design

Hot gas in the heat exchanger

- V6.05 Hot gas connection on the heat exchanger

Hot gas in the heat exchanger and in the drip tray, copper design
Copper with/without check valve

- Hot gas connection on both sides
- V6.07 with check valve
- V6.08 without check valve

On request: additional defrosting circuit: warm brine; the circuit is integrated into the heat exchanger.

Corrosion protection

Stainless steel casing

• **V3.12**

For protection in aggressive cold storage air, e.g. in smokehouses and curing areas, all casing components are stainless steel. Industrial quality.

• **Version V6.01**

Heat exchanger:

Tubing: Cu

Fins: Al „goldlack“ coating

End plates: Al protective coating on both sides

Casing: Al-Stucco.

Top Panel: Sendzimir galvanised steel, protective coating on both sides

Models

- **Version V6.02**

Heat exchanger:

Tubing: Stainless steel
 Fins: „goldlack“ coating
 End plates: Stainless steel

Casing: Al-stucco.

Top Panel: Sendzimir galvanised steel,
 protective coating on both sides

Refrigerant distributor: Standard Venturi

Stainless steel CAL® distributor on request

- **Version V6.03**

Heat exchanger:

Tubing: Stainless steel
 Fins: Al
 End plates: Al

Casing: Al-Stucco.

Top Panel: Sendzimir galvanised steel,
 protective coating on one side

Refrigerant distributor: Standard Venturi

Stainless steel CAL® distributor on request

- **Version V6.04**

Heat exchanger:

Tubing: Cu
 Fins: Al „goldlack“ coating
 End plates: Al

Casing: Al-Stucco.

Top Panel: Sendzimir galvanised steel,
 protective coating on one side

Further information regarding
 corrosion protection can be found
 on pages 132 to 135

Accessories

Adapter for textile hose connection and Shut-Up®

With the adapter (aluminium, powder-coated RAL 9018) mounting a PVC or textile hose and the Küba Shut-Up® quick and easy.

**Straightener design: plastic
(not suitable for fan collar heaters)**

Selection table

SG 053-063C	3	425	
SG 073-083C	3	425	
SG 093-103C	3	525	

For greater pressure drops we recommend using more powerful fans. When using textile or PVC hoses, take the Ø G (mm) in the selection table into consideration. For more information, contact our sales engineers, Tel.: ++49 (0)89 / 74473-0. For more detailed information, please see the information provided by the textile or PVC hose manufacturer.

Fan unit for assembling fan collar heaters

This fan unit (collar made of aluminium, powder-coated RAL 9018) is used to assemble a fan collar heater.

**Fan design:
suitable for use with fan collar heaters**

Applications

- Assembling fan collar heaters for deep-freezing starting at -18°C

If fan collar heaters are used for a deep-freeze application, a fan with an aluminium collar must be used instead of the standard fan unit. Please note this circumstance in planning.

Scope of delivery

Complete fan unit consisting of:

Collar:	Al Stucco, white powder-coated RAL 9018 Food quality Good protection against corrosion
Air Straightener:	Plastic
Motor and blade:	As for standard

Accessories

Recommended for frozen storage

- Shut-Up®
- Defrost hood
- Fan collar heaters
- Double insulated drip tray
- Insulate the top panel on site

Shut-Up®

The Küba Shut-Up® optimises the defrost process, particularly in deep-freeze applications.

Applications

- Frozen storage starting at -18°C
- Alternating defrosting of the Air Coolers in one room

Advantages (in connection with the defrosting hood)

With Shut-Up® and the defrost hood, a positive accumulation of heat occurs in the air cooler during the defrost process. The heat remains in the cooler, which means:

- Defrost times reduced by more than 50%
- Significant amounts of energy saved
- No frost build-up on the ceiling of the storage room or on the goods due to minimal vapour build-up
- Defrost temperature in cooler is $\leq 5^{\circ}\text{C}$

Calculation hint

Due to the additional external pressure, the air quantity and air cooler capacity change:

Model	Change in air quantity	Change in rating
SG commercial	-10%	-5%

Selection table

for model	Shut-Up®
SG... ☺	1 piece
SG... ☺ ☺	2 pieces
SG... ☺ ☺ ☺	3 pieces

Please plan to use an adapter.
Shut-Up® is not assembled upon delivery.

Cooling phase, fans switched on: Shut-Up® is inflated

Defrosting, fans switched off: Shut-Up® closes the air cooler

Accessories

Defrost hood

The defrosting hood optimises the defrost process, particularly in deep-freeze applications.

Applications

- Frozen storage starting at -18 °C
- Alternating defrosting of the Air Coolers in one room

Advantages (in connection with Shut-Up®)

With the defrost hood and Shut-Up® a positive accumulation of heat occurs in the air cooler during the defrost process. The heat remains in the cooler, which means:

- Defrost times reduced by more than 50%
- Significant amounts of energy saved
- No frost build-up on the ceiling of the storage room or on the goods due to minimal vapour build-up
- Defrost temperature in cooler is $\leq 5^{\circ}\text{C}$

Construction

- The defrosting hood consists of 6 mm of thick expanded polycarbonate
- To a large extent, the insulated plastic prevents temperatures from falling below the dew point and the related formation of ice.
- The material is temperature resistant from -100 °C to +140 °C
- Results of endurance tests with regard to contact with foodstuffs are available.
- The defrosting hoods are delivered as a kit for every fan module and can be assembled on site according to the enclosed assembly instructions
- Please note the minimum wall clearance „W_{min}“

Module dimensions and weight:

Model	H mm	B mm	T mm	Weight kg	W _{min.} mm
SG 11-23	600	352	270	1,8	290
SG 31-14	700	452	340	2,5	340
SG 51-63	800	502	410	3,0	430
SG 71-73	800	602	410	3,4	430
SG 81-83	800	752	410	4,1	430
SG 91-93	900	752	480	4,5	500
SG 101-103	900	1002	480	5,6	500

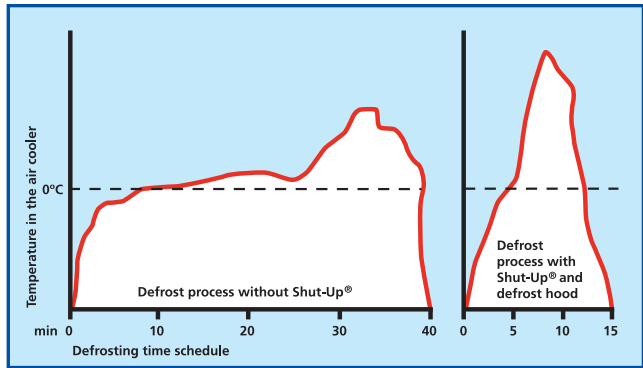

Calculation hint

Due to the additional external pressure, the air quantity and air cooler capacity change:

Model	Change in air quantity	Change in rating
SG commercial	-10%	-5%

For deep-freeze applications, Küba engineers recommend an insulated drip tray.

Defrosting process with Shut-Up® and defrost hood

Defrost time reduced by more than half

Defrost hood at air inlet

60

Accessories

Fan collar heater VRB

Benefits:

Prevents the fan blade at the collar from freezing up (in cases of extreme humidity in the freezer and frozen storage area)

Scope of delivery:

Electric tubular heater with stainless steel sleeve Ø 8,5 mm

Connection ends: 1,5 x 2000 mm

Tension spring: stainless steel

Fan collar heater cover

Benefits:

- Contact protection
- Reduces heat radiation from the fan collar heaters into the Cold Room
- Improves heat conductivity at the collar
- Increases the efficiency of the fan collar heaters
- Protects against slipping

Only available in connection with a metal air duct; fan unit for assembling a fan collar heater VRB, page 58!

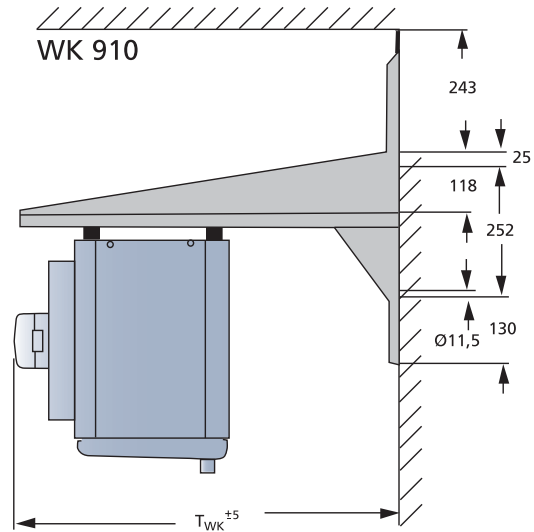

Accessories

Finned tube heaters SGHR

For Air Coolers with draw-through fans, on site assembly.
Suitable for air conditioning or heating in winter.

Only for use with running air cooler fans so that the ceiling of the cold storage areas does not overheat. Please observe the respective safety guidelines.

- Scope of delivery:
- Electric finned tube heater in stainless steel
 - Connection ends: 1,5 x 2000 mm
 - Assembly kit
 - Connection box IP 54

Accessories

Air hoses (on site procurement, not available from Küba)

Ventilation can be optimised with textile / PVC air hoses.

Applications

- Applications in work and production areas
- Cooled goods that are sensitive to drafts (e.g. flowers, ripening cheeses)

Advantages

The air hoses make uniform air distribution possible at very low air speeds.

- Working in a draft-free environment yields low illness rates
- Maximum protection for sensitive cooled goods
- No condensation water: temperatures do not fall below the dew point because air can penetrate the woven material

Calculation hint

Please order the corresponding adapter (see page 58). Please take the respective pressure drop for the cooler rating into consideration.
