

Si-20

PISTON PUMP

Inside the unit pump

The Si-20 is designed to easily fit **inside** mini-split air conditioning. (lineset free)

The piston technology is specifically designed for removing condensates from air conditioning systems. The Si-20 is fully reliable, in any kind of environment. Its operating sound level will remain silent whatever the volume of condensates.

BENEFITS

• Easy installation

- **Slim design.**
- Rubber damper: allows the pump to be put directly inside the mini-split air conditioning.
- Adequate cable lengths.
- "Drain Safe Device" aids connection to the discharge pipe. (pre-mounted)

• Silent

- Quiet in operation: **22 dBA.**
- The size of the air-conditioning unit and volume of condensates to be removed does not affect the operational sound level of the pump.
- **Unique rubber damper** specifically designed **to reduce vibration transmission to the mini split / wall.**
- Anti-vibration and condensate insulation included on suction line.

• Patented technology

- **High performance:** Only one pump, for air conditioning unit up to 20 kW
- **High Reliability.**
- **High resistance to pollution** created by general environment. Capable of discharging small particles.
- The **Drain Safe Device** retains prime and prolongs the pump life.

• Energy saving

Improved performance and high flow rate **reduce operation time** and energy consumption.
